About Us

All of our equipment is the finest available, outperforming and out handling any of our competitors. Our parent company established Canada Camera Car to design and build our first Insert Car in 1985. **Canada Camera Car** has continued to reliably manufacture and supply specialized equipment and personnel since then to hundreds of theatrical feature films and cable features, as well as countless television series, commercials, industrial and music videos.

Some of the services we provide exclusively to the film industry include mechanical design, welding, machining, GRP mould making and lay up, sheet metal fabrication and vehicle modifications. **Canada Camera Car** has the equipment, knowledgeable personnel and manufacturing expertise to provide your production with whatever you need to quickly and safely achieve the shot sequence you require.

We constantly reassess our industry and our equipment so that we can provide you with the very best service and products.
